

Assignment: Jot down your thoughts on the topic below:
Which would you prefer, power or money? (100- 120 words)

I would prefer money because, from my point of view, money is power. If you have money, you can buy anything and live your life as you want. In today's world, everything is for sale if you have money, you will be respected, no one respects poor man. If you are a wealthy man people will want to become friends with you, they invite you to their homes to have a relationship with you. whatever decision you make one will comply so, with money comes power, and from power comes money I think it is the same thing.
